EduGenie – Google Gemini Powered Learning Assistant

Proposed Solution

Team ID: SWTID-2026-5557 **Date:** 30 September 2026

Team Leader: Gayathri A **Members:** Srinivasan E, Saravanavel V

Solution Overview

EduGenie is a lightweight AI-powered learning assistant that provides five structured services: academic Q&A, concept explanation, summarization, quiz generation, and personalized learning paths. A FastAPI backend routes each request to a dedicated feature module, while a Gemini Service Layer manages model discovery, fallback, and offline/demo behavior.

Core Features

Feature	Description	Primary User Benefit
Q&A	Answers academic questions using Gemini.	Immediate clarification
Concept Explanation	Explains a topic at a selected difficulty level.	Easier understanding
Summarization	Condenses study passages into key points.	Faster revision
Quiz Generation	Creates questions, options, and answer keys.	Self-assessment
Learning Path	Creates an ordered, leveled roadmap for a topic.	Structured learning
Resilience	Discovers available models and falls back when needed.	More dependable operation

Expected Outcome

Students can obtain structured academic support through one simple interface without manually engineering detailed prompts for each learning task.
