

EduGenie – Google Gemini Powered Learning Assistant

Project Executable Files

Team ID: SWTID-2026-5557 **Date:** 30 September 2026

Team Leader: Gayathri A & & **Members:** Srinivasan E, Saravanavel V

Execution Package

Item	Purpose	Execution / Access
Application source	EduGenie backend and frontend	Run with Python environment and project dependencies.
requirements.txt	Python dependency manifest	Install using pip.
.env configuration	Gemini API key and settings	Create locally; do not commit secrets.
FastAPI application	REST API and web interface	Launch using Uvicorn.
Swagger UI	Interactive API documentation	Available at /docs when the application is running.
Templates / static assets	Web interface	Served by the FastAPI/Jinja2 application.

Typical Local Setup

1. Install Python 3.10+.
2. Create/activate a virtual environment.
3. Install dependencies from requirements.txt.
4. Set GEMINI_API_KEY in the environment or .env.
5. Start the FastAPI application with Uvicorn.
6. Open the local web interface or /docs.
