

EduGenie – Google Gemini Powered Learning Assistant

Sample Project Documentation

Team ID: SWTID-2026-5557 **Date:** 30 September 2026

Team Leader: Gayathri A **Members:** Srinivasan E, Saravanavel V

Project Summary

EduGenie is an AI-powered personalized learning assistant using Google Gemini. It provides Q&A, concept explanation, summarization, quiz generation, and personalized learning paths through a FastAPI web application.

Sample User Flow

Student selects a learning feature → enters academic content → FastAPI validates and routes the request → feature module builds a prompt → Gemini Service Layer selects a usable model → response is structured → result is displayed.

Sample Concept Explanation Request

Input: Topic = "Newton's Second Law of Motion"; Level = "Beginner". Expected output: a concise explanation appropriate for a beginner, with a simple interpretation and examples where supported.

Sample Quiz Output

A quiz request for three questions should return a structured set of questions, answer options, and an answer key that can be used for self-assessment.

Limitations

No persistent user accounts/progress tracking, single-language current implementation, possible LLM inaccuracies, and simplified offline responses.
